Product Data Sheet

Clear Skin Spot On

Art no: 1804xx

Reduces pimples and accelerates healing

Claims:

- For accurate and frequent applications-on-the go
- Reduces breakouts and strengthens your skin
- Perfect for sensitive skin - free from salicylic acid
- Easy take along – for precise spot on application.

Product description:

The Spot On pen is part of the Clear Skin Premium Kit but can also be purchased separately. The pen is perfect for direct treatment on breakouts and will instantly start to reduce the redness and appearance of them. To be used together with the Start Kit, Premium Kit or Clear Skin Reduce. Perfect to bring along during the day. Both a printed manual and a mobile application can support with personal guidance, as each treatment is individual. The Spot On Pen is handy to bring a long and apply multiple times for effective results.

Active ingredients / How it works:

Clear Skin Spot On contains large amounts of IgG (immunoglobolin G) which is also extracted from colostrum and will together with conjugated vitamin A improve skin quality. IgG has an anti-bacterial effect and helps to balance the skin's bacterial flora. Collagen helps to build the skin's thickness and elasticity, but when the degradation of collagen is greater than the production the skin will become thinner and more sensitive. Conjugated Vitamin A in Spot On has a very good ability to penetrate the skin cells and also promote the growth of collagen but also reduce its degradation. The improved quality of the skin effectively contributes to the long-term resilience to new acne attacks.

Unique Competitive Advantages

- Perfect skin maintenance after using the Beconfident 2-step Clear Skin Start Kit.
- Zero Salicylic Acid which means no skin dryness
- Added Vitamin A which strengthens skin and IgG gives prolonged action and protection against future spots
- Beconfident® Clear Skin App support
- Handy to bring along to speed up treatment
