

Short instructions how to use also on packaging

The new Beconfident® Teeth Whitening Night Serum repairs enamel and whitens teeth as you sleep.

The new Beconfident® Teeth Whitening Night Serum repairs enamel and whitens teeth as you sleep.

Due to the innovative formula, it helps to strengthen and fill micro-cracks in the enamel during the night as it simultaneously removes discolorations and tartar.

The result: Repaired, strengthened and visibly whiter teeth with shiny surface.

Usage instructions:

After brushing teeth in evening, apply the Night Serum with the built-in brush applicator directly onto your teeth or squeeze out a pearl drop onto your fingertip and apply onto teeth surface.

Let the serum stay onto teeth during night, do not rinse off.
