

WhiteAmin® Toothpaste

Art no: 1400xx

Whitens, Freshens and Vitaminizes

Claims:

- WhiteAmin® worlds first tooth paste with Vitamines A, B6 and C that nourishes your gum every time you brush

Product description:

WhiteAmin® is Beconfident's whitening toothpaste that contains vitamins (vitamins A, B6, and C). The vitamins are absorbed by the gum and oral cavity when brushing twice per day. It can be used every day, as it does not contain any abrasives. It has a fresh silk mint taste and leaves the teeth clean and smooth. Compatible with both electric and regular toothbrushes. Packaged in a designed hygienic airless bottle.

Active ingredients / How it works:

WhiteAmin® is the first vitamin-containing whitening toothpaste to incorporate the Calcium Peroxide. By omitting silica, a harsh and grainy abrasive that damages the enamel, calcium peroxide gently scrubs the enamel clean (far safer than silica) and also gently releases whitening molecules to make teeth as white as they can be. Specifically, the calcium peroxide works by gently dissolving the protein pellicle - a brown layer of protein that forms on the tooth surface, to which plaque, bacteria, and stains adhere. Removing the stained pellicle leaves the teeth looking and feeling cleaner for a longer period of time.

WhiteAmin® also contains Calcium & Phosphates to help strengthen and re-mineralize the enamel. Our Whitening Toothpaste with calcium peroxide removes surface stains on natural teeth and is especially kind to artificial tooth surfaces including bonding, veneers, laminates, and dentures.

WhiteAmin® contains three essential vitamins. Vitamin A is a fat soluble vitamin that is also a powerful antioxidant. Vitamin A plays a critical role in maintaining healthy vision, neurological function, healthy skin, and more. Vitamin A- like all antioxidants- is involved in reducing inflammation through fighting free radical damage. Antioxidants like Vitamin A are also responsible for building strong bones, regulating gene regulation, maintaining healthy clear skin, facilitating cell differentiation, and supporting immune function.

Vitamin B6 is needed for proper brain development and function and to make the hormones serotonin and norepinephrine, which affect mood. Vitamin B6 also helps the body make melatonin, which is important in helping regulate your internal clock.

Last but not least it also has added Vitamin C which include protection against immune system deficiencies, cardiovascular disease, prenatal health problems, eye disease, and even skin wrinkling.
