- Liquid Calcium repairs micro cracks in the enamel and prevents sensitivity
- For approximately 30+ uses
- Re-mineralizes and repairs enamel (Hydroxyapatite)
- Soothes and moisturizes gums
- Prevents cavities, tartar & stains
- Safe and without side effects

Product description:

The Protect & Repair Teeth Gel is a brand-new product developed by Beconfident. The gel repairs enamel and helps continue whitening after the regular teeth whitening sessions. Due to the innovative formula, it helps to strengthen and fill micro-cracks in the enamel during the night as it simultaneously removes discolorations and tartar. The result: Repaired, strengthened and visibly whiter teeth with shiny surface. The product is applied to the teeth after being brushing in the evening, and then left on the teeth to work over night. The formula contains Hydroxyapatite which helps to repair enamel and strengthen the teeth. It will clean and whiten teeth gradually without any hard ingredients or side effects.

Active ingredients / How it works in short:

The enamel consists of about 97% of hydroxyapatite. The serum also contain Hydroxyapatite and will support the natural repair process after whitening. Even incipient caries lesions can be repaired. Daily brushing with a hydroxyapatite-containing toothpaste also helps to seal the so-called dentine tubules. In the case of exposed dentine due to gum recession, the pain sensitivity associated with thermal and chemical stimuli can be significantly reduced.

The serum also contains a sodium salt called Tetranatrium pyrophosphat that helps to dissolve the discoloration of the teeth and to remove them more easily. Furthermore, the pyrophosphate has the property to restrict the formation of tartar. It also contains sorbitol which has moisturizing characteristics and Sodium Fluoride to prevent caries. Chamomile is an extract from the flowers of chamomile which has a soothing effect on the gums.

Unique Competitive Advantages Protect & Repair Teeth Gel:

- Unique patented formula which adds extra effect to teeth whitening
- Repairs and strengthens damaged enamel
- No need for trays, applies easily in 30 seconds without any hassle
- Immediate optic whitening effect
